

## Installation:

1. Double-click on “keyword-warrior.exe” and the following screen will appear:

2. Go through the installation process and once you're done, select the “Launch Keyword Warrior” option and click “Finish”.

3. FOR WINDOWS VISTA USERS: [Please check this video](#) for an additional step to complete in order to use Keyword Warrior on your computer.

## Using Keyword Warrior

1. Click on the “Main Keyword” button and enter the main keyword you would like to search for.

2. Click on “Gather Keywords” to start the keyword gathering process.
3. Click on “Add Keywords” to add another keyword search in addition to your main keyword.
4. Click on “Gather Data” to generate the amount of searches on different search engines.
5. Click on “Save Results” to save the results of your current search.
6. Click on “Delete All” to clear all search results.

**\*\* Note:** A security check appears whenever you make 7-10 searches within 30 minutes. It comes from the WordTracker site which we're extracting data from.

You should be able to download the image and fill the right characters in, but there are times when it fails.

In any case, if it fails, simply visit <http://freekeywords.wordtracker.com> and you'll be able to fill in the captcha code there.
